What is Medical Transcription?

Medical Transcription is an interesting and challenging career. It is the process whereby one accurately and swiftly transcribes medical records dictated by doctors and others. While consulting a patient the doctor dictates through a device called Dictaphone. The voice is then electronically transferred via satellite and downloaded into the Transcription Server i.e. computer system, from where Medical Transcriptionist pick up the voice and transcribe it electronically. After transcribing, the electronic document is sent for editing/proof reading for more quality check and is uploaded back via satellite again to the computer/printer in the doctor's office/clinic to be printed out into a hard copy which is required by insurance companies to make payment to the hospitals. Now a days all major hospitals and insurance companies are using this transcription system.

What is the eligibility ?

The candidate should be minimum plus two completed, Graduation in Medicine, Nursing, Pharmacy, Science will be added advantage. Transcription Speed and Accuracy are the key elements that determine the success of a Medical Transcriptionist. Any person with a good command of English, excellent typing skills and who is capable of accurately transcribing voice files to text files could be a successful Medical Transcriptionist. For admission, an applicant will be required to take an English written test.
